Big Crossbar Profile	8.35mm x 60.49mm		
Small Crossbar Profile	45.16mm x 61.2mm	Electric Motor's Voltage	110V Or 220V
Wall bracket	90mm*130mm*5.0mm	Remote Control	1 Channel
Motor bracket	90mm*130mm*5.0mm	Wind Load Resistance	Class 6 (up to 50-60km/h)
Linear Strip LED Lights	4000K (Yellow) Or other	Installation	Installation instruction is provided by manuals and videos
Motor brand	DOOYA SOMFY A-OK		

The outdoor aluminium motorized PVC fabric retractable pergola is well-suited for several types of buildings in the United States for several reasons:

- Versatile Climate Adaptation:** The United States has a diverse climate, ranging from hot and sunny regions to areas with frequent rain and strong winds. The retractable feature of this pergola allows for protection from the elements when needed, while still providing an open-air experience when the weather is favorable. The PVC fabric offers shade during hot summers and can be retracted to let in sunlight during cooler months.
- Aesthetic Appeal:** American architecture often values modern and sleek designs. The aluminium frame of the pergola provides a contemporary look that can complement a wide range of architectural styles, from traditional homes to modern commercial buildings. The clean lines and customizable options make it an attractive addition that enhances the curb appeal or outdoor spaces of various properties.
- Durability and Low Maintenance:** The aluminium construction is resistant to rust and corrosion, making it suitable for the varying weather conditions across the country. PVC fabric is relatively easy to clean and maintain, reducing the long-term upkeep costs. This is important for buildings in the US where owners seek durable and hassle-free outdoor solutions.
- Energy Efficiency:** In regions with hot summers, the shade provided by the pergola can significantly reduce the heat gain inside the building, thereby lowering the demand for air conditioning and contributing to energy savings.
- Outdoor Living Culture:** Americans have a strong appreciation for outdoor living and entertainment. The pergola creates an inviting and functional outdoor space that can be used for dining, relaxation, or social gatherings, aligning with the lifestyle preferences of many.
- Code Compliance:** The design and materials of the pergola can often meet local building codes and regulations, making it a feasible option for both residential and commercial construction without major compliance hurdles.
- Space Optimization:** In urban areas where space is at a premium, the retractable pergola offers a flexible way to maximize the use of outdoor areas without taking up too much permanent space.
- Resilience to Natural Disasters:** In areas prone to hurricanes or severe storms, the sturdy aluminium frame and retractable nature of the pergola can offer some protection and reduce potential damage compared to more fragile outdoor structures.

**Rain or Shine,Cold or Hot!
Our Pergolas Are As Firm As Rock!
We can make a difference !
We can bring you something New something Different !
We can provide you the best solutions for the outdoor awnings!
