Tips of The Products

The combination of Aluminium Zip track roller blinds and outdoor aluminium louvered blade motorized blinds brings numerous benefits:

Enhanced Privacy and Sun Protection: The Aluminium Zip track roller blinds can provide complete privacy when needed indoors, while the outdoor aluminium louvered blade motorized blinds offer an additional layer of protection from direct sunlight. For instance, during the hottest part of the day, you can adjust both to create a cool and secluded environment.

Increased Energy Efficiency: Together, they help to regulate the indoor temperature more effectively. The Zip track roller blinds prevent heat loss in winter and keep the heat out in summer. The outdoor louvered blinds further contribute by blocking excessive sunlight, reducing the reliance on air conditioning and heating systems and saving energy costs.

Versatile Light Control: You have greater control over the amount and direction of light entering the space. The louvered blinds can be angled to allow diffused light while still maintaining privacy. The roller blinds can be used to completely darken the room when desired.

Weather Resistance: Both types of blinds are made of aluminium, which is highly resistant to the elements. This ensures they can withstand outdoor conditions such as rain, wind, and UV rays without deteriorating.

Aesthetic Appeal: The combination creates a visually appealing and coordinated look. The sleek and modern design of both blinds adds a touch of elegance to the exterior and interior of the building.

Convenience and Automation: The motorized feature of the outdoor louvered blinds and the easy operation of the Zip track roller blinds make it effortless to adjust them as per your requirements. You can control them with a remote or integrate them into a smart home system for added convenience.

Improved Security: When closed, they act as a deterrent, adding an extra layer of security to your property.

Noise Reduction: The multiple layers of blinds can help to reduce outside noise, creating a quieter and more peaceful indoor environment.
